Improve Productivity in the Field
with QuikID™ Password-less Authentication

QuikID™ enables mobile field service staff to securely and conveniently authenticate to laptops and tablets using password-less authentication to improve productivity while increasing network & data security.

Optimize Convenience without Compromising Security

QuikID™ apps let field staff use a smartphone or smartwatch to conveniently log into mobile workstations without having to manually enter complex passwords. QuikID™ is a compelling solution, which avoids username & password entry, and expensive smartcard, software or hardware based authentication solutions. Easy to deploy and use, and totally secure. Integrated with Microsoft Active Directory or MDM solutions where necessary to meet Enterprise compliance, password and device management, and audit requirements. The QuikID™ Microsoft or MAC Dashboard Client software resides on the laptop or PC as a session manager.

Key Product Benefits

QuikID™ Solutions Offer:

- Secure password-less authentication using smartphones or smartwatches and encrypted wireless communications

- Proximity and session settings to determine how and when devices are locked or unlocked, depending on Enterprise policies

- Microsoft Windows and MAC QuikID™ Dashboard Client software to manage the sessions and authorized devices

- Integration with Enterprise authentication backends to improve network & data security

- Increases productivity and convenience

- Delivers compelling ROI with a lower total cost of ownership

- Provides secure access to sensitive data and networks, minimizing the threat of data breaches

- Fast, easy and scalable Enterprise deployment and management

- Leverages existing IT infrastructure without additional servers

QuikID™ Mobile Apps work in tandem with QuikID™ Windows and MAC Dashboard Client Software that is easily downloaded from our website (or deployed by your IT department) and paired with your smartphone or smartwatch using existing username and complex passwords. Once bonded for life, your PC, laptop or tablet automatically unlocks and locks when required, without the need to enter usernames or passwords.

About Us

Founded in 2010, with offices in Vancouver, BC, Redwood City, California and Cork, Ireland, FusionPipe Software's vision is to provide innovative authentication and data security solutions for Enterprises and Consumers that reduce the threat of compromised passwords and data breaches, improve employee productivity, offer secure end-user convenience and reduce costs.

FusionPipe's password-less authentication applications and data security solutions are specifically developed to offer secure end-user convenience for the Utilities, Healthcare, Telecommunications and Financial Services industries as well as Government agencies and the Public Service.

Our patent pending QuikSafe™ technology solutions and Secure Communications Framework are the results of extensive R&D initiatives and collaboration with universities and research Labs and through establishing strategic vendor partnerships with SAP, Microsoft, Cisco, Samsung, Intel/McAfee, VMWare, AWS and Trustonic.

To date FusionPipe has been nominated for various awards, including BCTIA Most Promising Start Up Finalist, 2014 CIX Top 20 Canadian Companies, DigiBC Top 25 Innovative Companies in BC, NextBC Audience Choice Award, and Deloitte Fast 50 BC Finalist.
